MONEY, STOCKS AND GRAIN

No Speedy Change Can Be Expected in the General Situation at New York.

At Indianapolis Wheat Was Slightly Easier, and Corn and Oats Firmer-Certain Lines of Dry Goods Show New Activity.

THE BOND MARK 'T.

Saveral Heavy Drives in Stocks Influenced

the Railroad Issues. At New York, yesterday, money on call was easy at 1214 per cent., the last loan being made at 11/2, closing offered at 11/2 per

Prime mercantile paper, 5@6 per cent. Sterling exchange was quiet but steady at \$4.87 for sixty-day vills and \$4.88% for

demand. The total sales of stocks were 248,084 shares, including the following: Atchison, 10,775; Chicago Gas, 12,920; Erie, 17,570; Louisville & Nashville, 17,788; Northwestern, 3,800; Northern Pacific preferred, 19,-

977; Reading, 45,485; St. Paul, 21,910; Union Pacific. 4,100. The stock market was less interesting than that of Tuesday, and the transactions of significance were narrowed down to three or four stocks. No change in the general situation seems likely to be made until the crops are well forward. The granting of a preliminary injunction by the chancellor of New Jersey, restraining

the Port Reading railroad from operating the Jersey Central, was made the basis of an attack upon Reading, and the early weakness resulted in a loss of something over 1 per cent. The influence of this did not outlast the forenoon, and a partial recovery was followed by dullness. Northern Pacific preferred was the other special point of attack, but the occasion for the drive was old and its result was measured by smaller figures than that in Reading. Burlington in the forenoon and Louisville & Nashville later in the day were subjected to some pressure, but with St. Paul and Erie they were held within narrow limits. The industrials continued to be the strong features of the market, but in none of these even was the range of prices of importance. The opening was made at lower prices, Reading leading with a loss of 1/8 per cent. The bears concentrated their efforts at first on Reading. but later Northern Pacific preferred was taken in hand and Louisville & Nash-ville followed. The declines in these stocks, however, failed to dislodge stocks in the general list, and as quotations went down a more stubborn resistance was met, which compelled the operators for lower figures to turn their atten-tion to fresh fields. Accordingly such stocks as C., C., C. & St. L., in the absence of support, were suddenly attacked and driven down from 674 to 65. Erie preferred from 66 to 64, and Jersey Central was re-membered late in the day and sold off from 140 to 1384. Oregon Navigation also sold down to 65, but recovered a portion of the loss, rallying to 67. Burlington, Rock Island and St. Paul were pressed for sale, but the resistance was so efficient that the fluctuations of neither reached more than a fraction. The close was heavy, though quiet, at insignificant changes in most of the list. The industrials, which had been the strong point in the market, were dropped suddenly in the last hour, and the lead stocks are lower. Among the active stocks final changes were insignificant ex-

cept in Reading, which lost 1 per cent. Railroad bonds in the main were still firm to-day, but there was less animation in the list. The Reading issues developed some weakness, following the stock, though no material loss occurred. The sales reached \$1,615,000, with special activity in Atchison incomes, Detroit, Mackinse & Marquette land grants and the Readings. Government bonds were duil and steady. State bonds were dull and steady. Closing quotations were:

Four per cent. reg. 116¹⁴ Louis. & Nash.... 72³. Four per ct. coup. 117¹⁴ L. & New Albany. 24 Pacific 6s of '95...*106 Missouri Pacific... 55⁵. C., C., C. & St. L...* 6558 Pullman Palace.. 197

LABOR'S WORST ENEMY Appears to Be the Democracy and Its Free-Trade Principles.

It is a curious fact that the Democratic leaders are endeavoring to force upon America an economic policy which the Conservative party of England has almost resolved to repudiate as ruinous to the interests of the workingmen of that country. "Free trade," says Lord Salisbury, "is no-ble in theory, but it is unbusinessiike." The great majority of the artisans of England re-echo his sentiments, and will in all probability support him at the polls in the coming elections. It means not only a political but an industrial revolution. The great McKinley act accomplished it. It shut millions of dollars' worth of English goods out of our markets, and to that extent injured the English manufacturer and the English mechanic. No market bas been found to take the place of

the lost American one, and the workingmen of England cannot hold out against the cheap labor of Belgium, Italy, Germany and other countries. The American market is the greatest in the world. If the Democratic party can have its way it will again be given to England. The English manufacturers will coin money, and the English artisans will throw up their hats for free trade. | Pro-Democracy is really its worst enemy. It is

fessing to be the best friend of labor, the for the foreigner every time, and against the native and adopted workingman. Protection has well been called "the American doctrine." It builds up American cities, towns, factories, farms. It builds up the school-house and the church. It has made America the first nation in the world. The British Premier is wise in following our lead.

Birds vs. Insects.

Dr. B. D. Halste'l, in the Agriculturist. In nature there is a general overruling law which is roughly stated in the common saying. "The weakest must go to the wall." the action of which is very self-evident to those who have given much attention to the study of birds and insects. It is only when man so modifies nature that the law does not have free action that the balance is destroyed, and evil results. In-sects, as well as the birds, doubtess have their proper place fill in the great scheme of creation, and, like many things else, when held within bounds are for the common good. "When the cat is away the mice will play." So, when the birds are scarce the insects abound, sometimes to our discomfort, and even dismay. I do not wish here to make any plea for the protection of birds on the ground of beauty of their form or coloring, or the sweetness of their songs, but upon the purely utilitarian basis of guardians of crops from the destructive workings of the various injurious insects. Some birds do not eat insects, but the list is small. Audubon has stated that a woodcock will eat its own weight of insects in a day. The common chipping sparrow destroys many a tent caterpillar moth. Birds have been constantly on the decrease, from the destruction of the forests and other more direct causes due to man, while, on the other hand, the insects have steadily increased. There seems to be an eternal hatred of birds, born with some boys, which it is painful to see in its varied manifestations. The stoning of old birds, robbing their nests, and killing the young, is to be strongly condemned. Kindness to our feathered friends must come largely from home and school training. Parent and teacher can do much in this regard.

The President at Home.

Kate Field's Washington. President Harrison has an accomplishment with which he is not often credited. It is usually claimed that he is lacking in megnetism, and that he repels rather than attracts those with whom he has dealings. It is true that he is reserved, but those who enjoy the privilege of being reckoned among the intimate friends of the President's family aver that it also undeniable that when the President wants to, he can be extremely agreeable. When he has just accomplished something to his satisfaction and no monentous affairs of state are pressing on his mind, he sometimes comes into the family room where a few pleasant people are gathered, and proceeds to entertain them until those who see him in that mood is a capital talker when in this lighter yein, and people who have accepted the current estimate of his lack of geniality have to re-

LET DEAD BURY THE DEAD

Chicago Operators Begin Plunging Again Regardless of the Corn Fiasco.

Bad Weather G ves Prices a Boost and Later Reports Cause a Quick Recession-Pork Went Up, but Fell Again with a Thud.

TRADING AT CHICAGO. Grangers Thronging the Board Waiting for

Corn to Go Up. CHICAGO, June 1 .- Quick forgetfulness was the fate accorded the corn corner today. There was a lively market to contend with, and it demanded all the attention there was. The chief feature was the weather. Hundreds of stations throughout the corn belt reported another night of heavy rain, and no prospects of a let up. Messages from the country all the way from Kansas City to Indianapolis were of the most discouraging character. Prime reported the conditions less favorable than ten days ago and said that no corn could be planted in Illinois, Ohio or Indiana this week. More than all this the floor was pretty well sprinkled with countrymen who are on hand to get on the bull side of corn and oats in the expectation of higher prices when the damage is fully understood. The market opened with a decided bulge of 1c or more. There was a little reaction caused by the selling on the bulge when a second advance put prices to the high point of the session, and about 14c over the close yesterday. Later in the day the signal service pointed to wet weather for Thursday, and the market sold off quickly, losing about half the early ad-Wheat opened & @ so higher than yes-

terday's closing and advanced 'sc more; then declined 4c. fluctuated some and closed quiet, higher than last night. Trading was mainly local and of moderate volume. Reports of rain from the West and Southwest and indications of dampness in the Northwest caus vance. It was also claimed that wheat, if the weather turns hot, is liable to rust, and is in a critical condition. There was also talk about the government report, which, it was thought, would make a bad showing. Late in the day a rumor that the Hatch bill might be before the House before night caused some selling. Predictions of clearing weather also helped weaken the market to 82 kc, the low point of the day, but there was a rally before the close on buying by shorts. Oats were fairly active all day, the mar-ket fluctuating with corn and closing 40

better than last night. The provision trade was not a heavy one and prices were easily influenced. Although the board showed nearly forty thousand hogs at the yards and prices 50 10c lower, there was enough influence from the strong corn market to start prices steady or higher. Later in the day pro-visions weakened with the easier feeling in the grain markets. It was said that Cudahy sold out quite a line bought last week. To-night, compared with last even-ing, pork and ribs show a net decline of 732c each and lard .0212c.

There was more demand for vessel room and rates held steady at 152c for wheat and 14c for corn and oats to Buffalo. Estimated receipts for to-morrow are: Wheat, 108
